

Cloud solution – Software as a Service ...

Environmental Monitoring and Information Management

Landfills

Drinking water

Waste water

Watersheds

Industrial effluents

Metering stations

MAPGRAPH Environment provides public organisations and ISO 14000 companies with a complete web-based system for environmental monitoring and information management.

We import and organise all your laboratory and environmental data, and provide online metering stations for any purpose. The data is continuously validated and deviations are reported. Your environmental data can be accessed from anywhere and shared across organisations.

MAPGRAPH Environment saves time, ensures continuity and contributes to efficient environmental management. For more information, please call +47 67 21 59 00 or send an Email to envitech@envitech.no.
