## Giving consumers easy access to their drinking water quality data

MAPGRAPH Public Portal
# for drinking water quality

Water authorities require consumers to have access to updated information about the quality of their drinking water. MAPGRAPH Public Portal is an ad-on solution to the MAPGRAPH Drinking Water Quality system. The portal is seamlessly embedded in the water suppliers' own website - and consumers can access the water quality at their geo location by clicking on a local map.

With a map-based, graphical user interface, the public portal presents water quality data in an interesting and easy to understand format.

Consumers choose the waterworks and the measuring stations closest to their residential address.

- Ready-made solution for seamless integration in the water suppliers' and/or local authorities' website.

- Provides access to drinking water quality at each waterwork in the region - and consumers can easily find the water quality at their nearest test site.

- The solution is delivered map-based or in tabular form, and additional information is provided about each parameter.

- An innovative and time-saving solution.

- MAPGRAPH Public Portal is delivered as a cost-effective cloud-based Software-as-a-Service (SaaS) solution.

- MAPGRAPH Environment is available in all languages.
